Lithonia; Japan; China; New Zealand; Australia; Korea; Ireland; Germany and Nigeria.

PROCESS:

Hand-Harvested during first week of February, keeping a correct ripen in sugar levels and flavors. Stemming machine is used to obtain whole berries, keep the fruit and avoid oxidation process. We use N2 and CO2 in the entire process to avoid flavors oxidation. The Alcoholic fermentation takes 15 days. We carefully keep the temperature controlled, to enhance fruits flavors we have to carry out the fermentation between 10 °C and 15 °C. We avoid to carry out a complete malolactic fermentation of this chardonnay to enhance its characteristics of flowers and fruits. We try to keep the fruit from the vine to the bottle.
